Indonesian Case

- The success to prevent global crisis impact in 2008 was not by design. Issues: less exports, de-industrialization, low competition, inefficient local expenditures.
- After decentralization, too much political interests dictating local budgets.
- Local expenditures: lop-sided for public salaries, much reserved and unspent (Rp 49 T in total), mis-targeted on local development challenges.
- Local leaders & local polity determines budget efficacy under decentralized governance.

Local Budgeting Issues in Indonesia

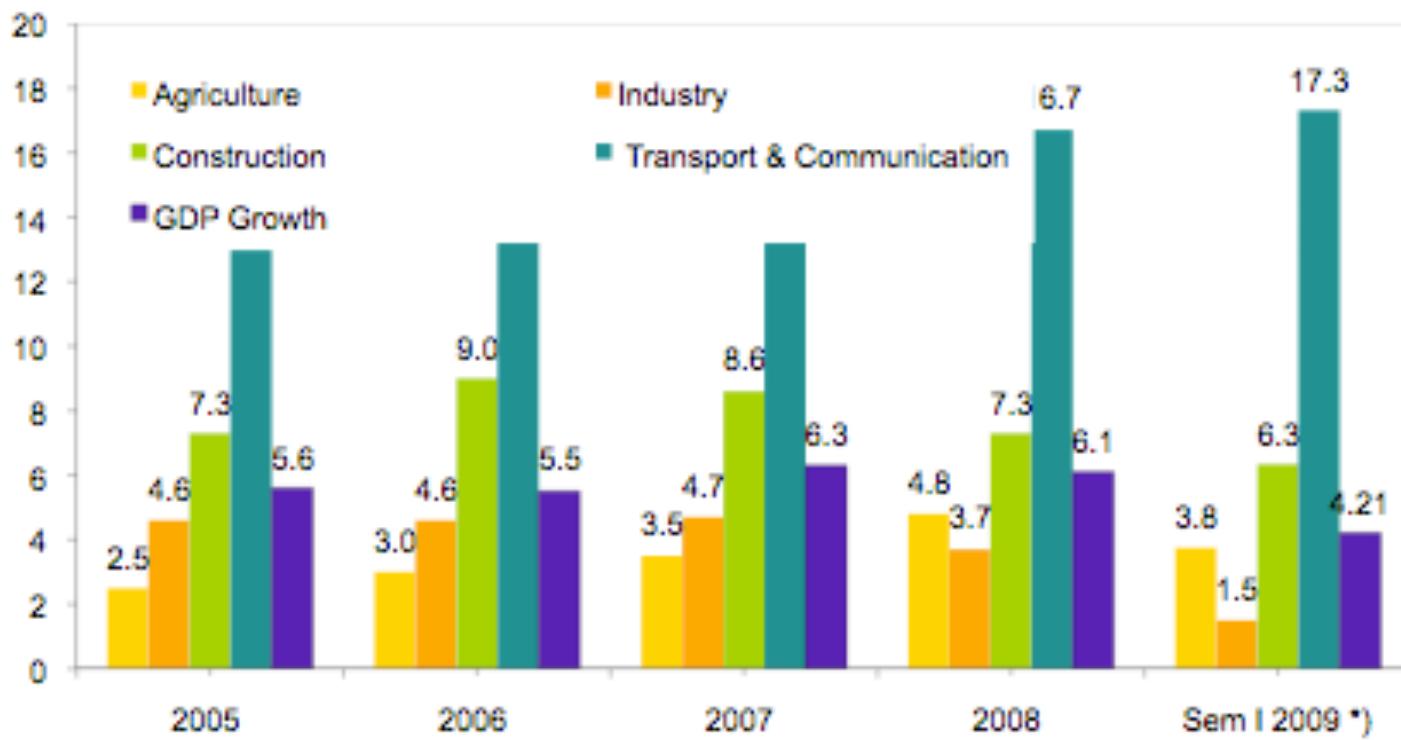

- Budget cycles: 1st Jan-31st Dec. In reality: disbursed from May onward. Too many procedures for disbursement.
- Reserves & unspent expenditures. Local govts tend to put money into govt bonds (SBI) than invest for development.
- Budget administration: expenditures on investment: 10.4% of national budget, 18% of local budgets.

Dictating Political Interests

- Local councils (DPRD) and local govt units are “budget maximizers” (Tullock, 1987)
- Money politics & corruption; business “political investments”
- Expenditures for people’s welfare and combating poverty are left un-prioritized.

Trends of De-industrialization

Crisis, Poverty/Unemployment & Local Budgets

- The 2008-2009 crisis has demonstrated that despite the Indonesian relative resiliency of the economy, agriculture sector was hard hit
- About 50,000 layoffs in agricultural-intensive and unskilled labor-intensive sectors
- Fragile near-poor, non-income poverty
- Regional disparity/imbalance
- Local budgets are not responsive to problems of poverty & unemployment.

Iklim Bisnis Di Indonesia

Ease of...	2007 rank	2006 rank	2005 rank
Starting a Business	167	161	161
Dealing with Licenses	179	131	129

Ranking Kemudahan untuk Menjalankan Usaha

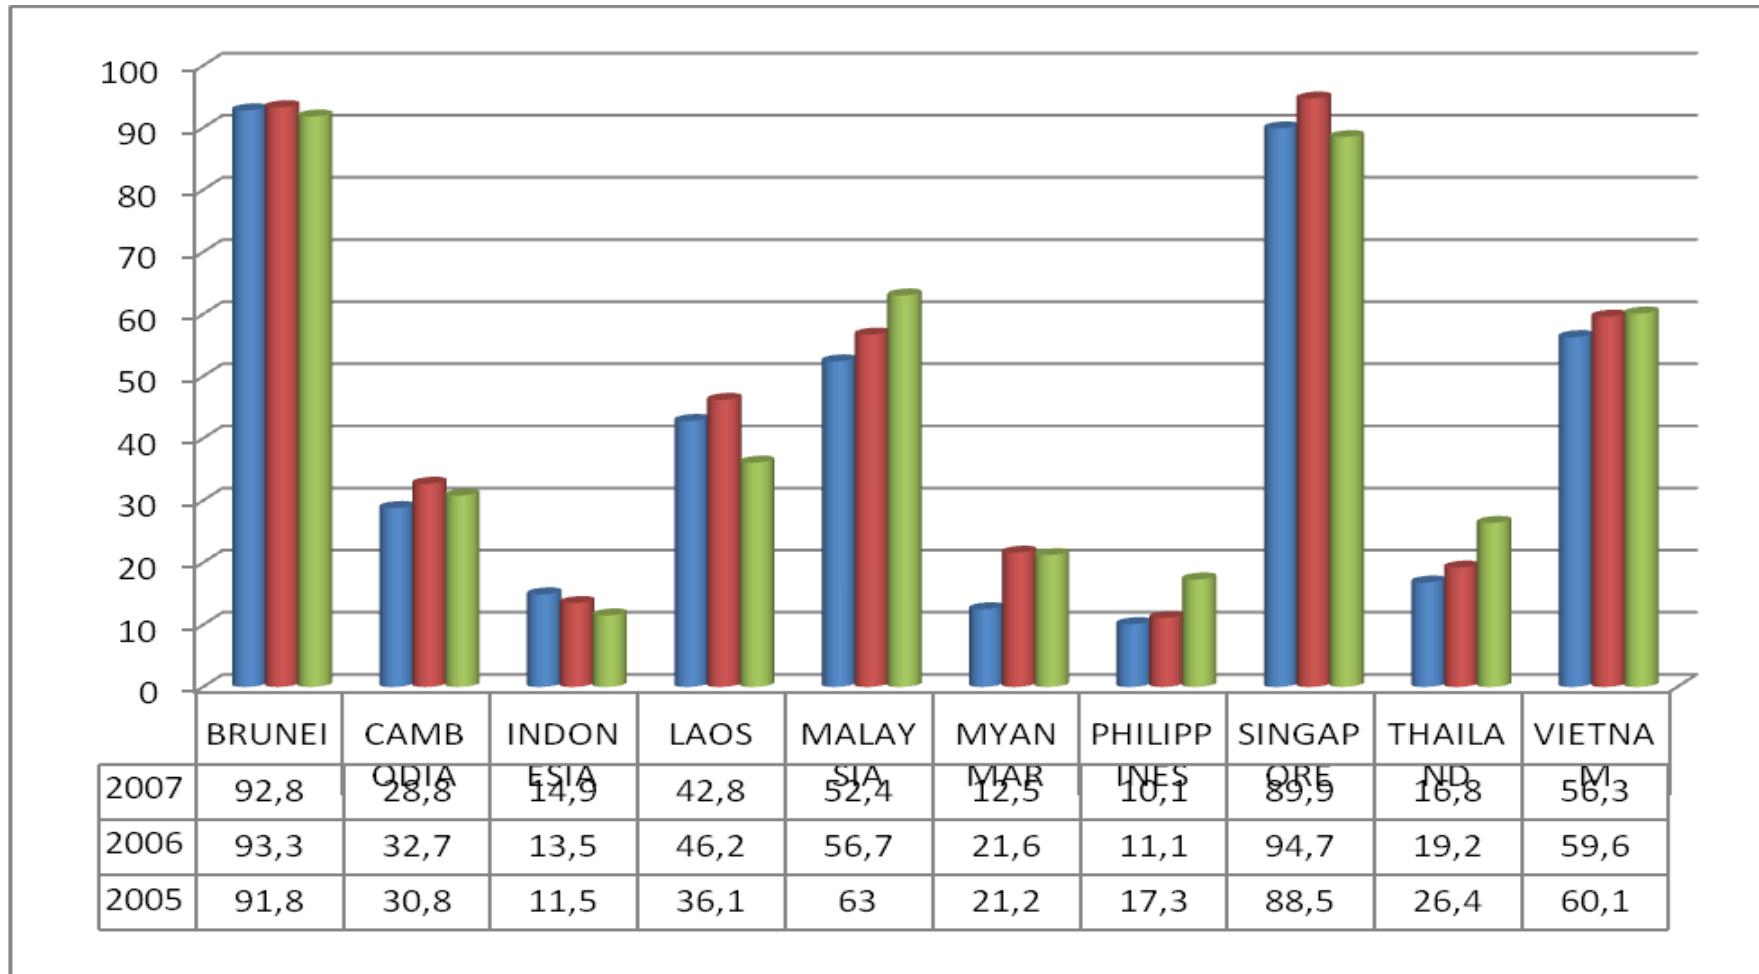

Perkembangan Indeks Governance 2004-2007

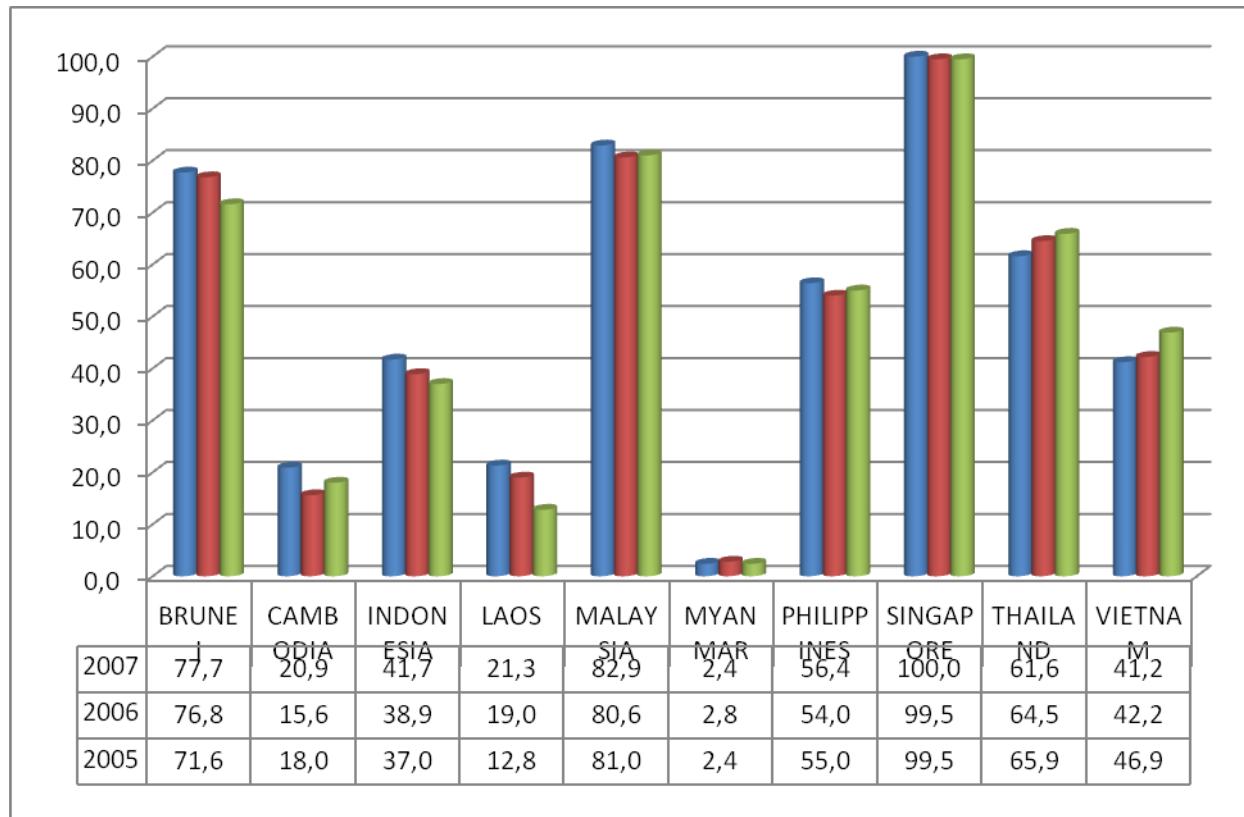

Perbandingan dengan Negara Lain

- Meskipun ada trend peningkatan indeks governance di Indonesia dari 2004-2010, tetapi dibandingkan dengan negara-negara Asia Tenggara yang lain, peningkatan tersebut belum signifikan.

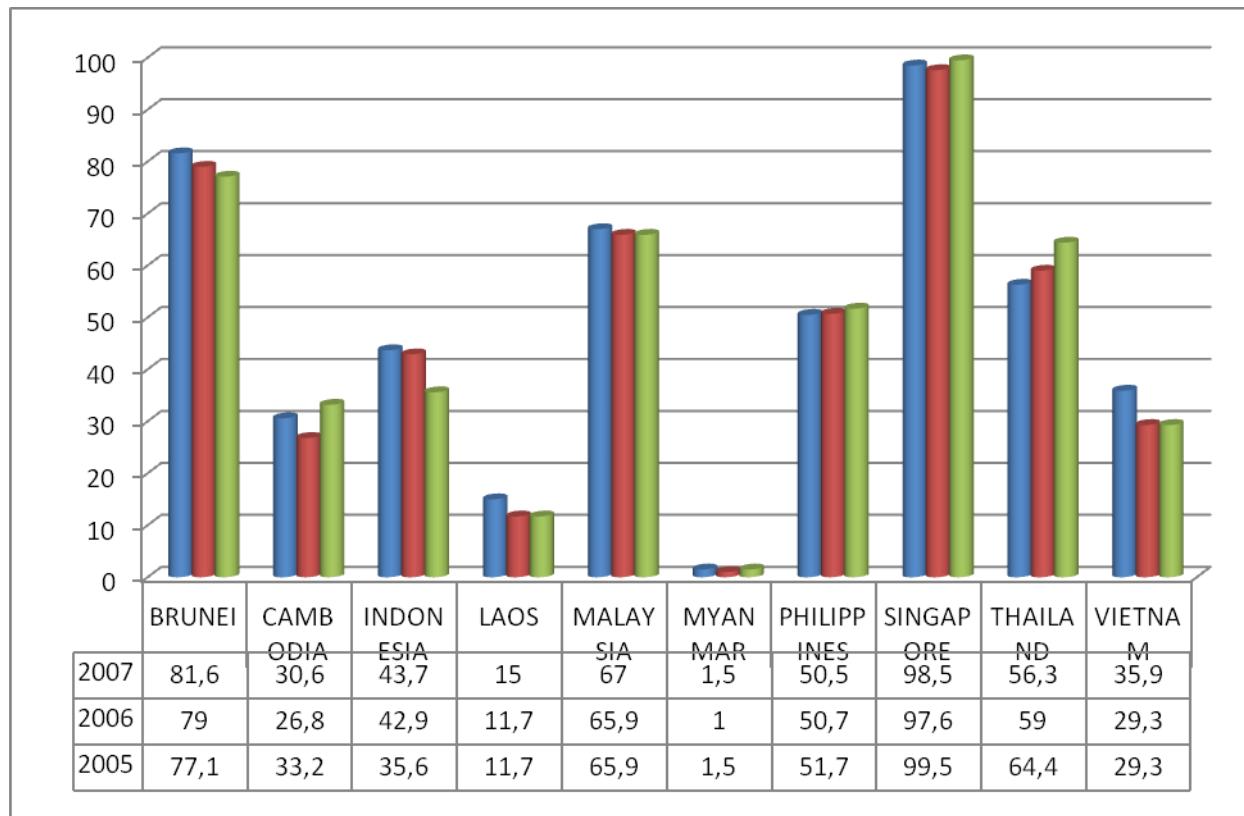

Political stability

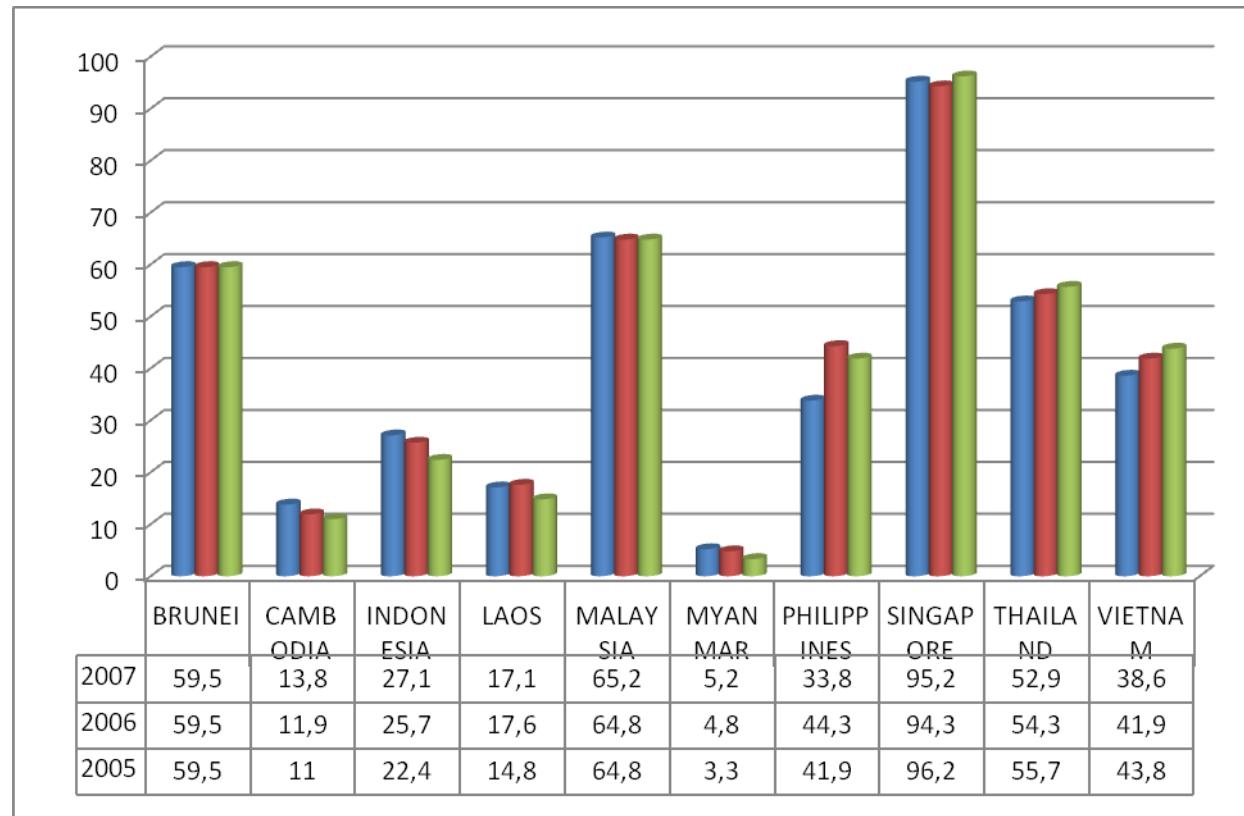

Government effectiveness

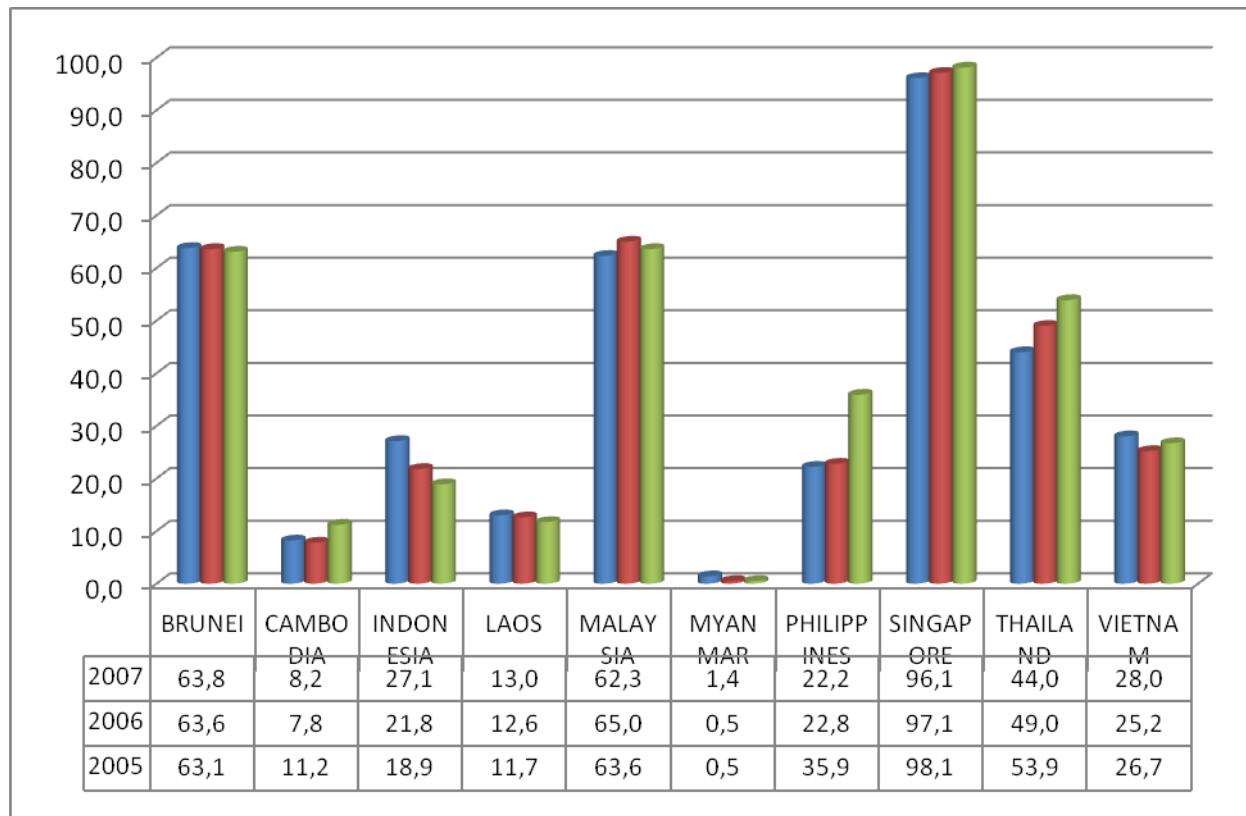

Quality of Regulation

Rule of law

Control of corruption

Kesimpulan

1. Situasi politik dan perkembangan governance (tata-pemerintahan) di Indonesia masih belum user-friendly
2. Tetapi banyak peluang baru yang menjanjikan jika upward trend dari stabilitas politik dan capital inflow dapat dimanfaatkan oleh bisnis.
3. Bisnis tetap akan mendapat pengaruh buruk dari birokrasi publik yang belum efisien, tetapi bisnis dapat mendorong perubahan dalam birokrasi (exit strategy, combating corruption, chamber of trade, dsb).
